

ABC'S OF WATER: SOLVING THE SALTON SEA

Tackling an ecological disaster with innovative policies and groundbreaking science

The water industry is perpetually pushing the boundaries of innovation in science — something that will be necessary to solve one of California's most pressing issues: the deterioration of the Salton Sea. Join Salton Sea Authority General Manager Phil Rosentrater at the next ABC's of Water where he will discuss how the water industry is hoping to restore and revitalize the state's largest lake. This is the first lecture in a two-part series looking at innovation in the water industry. Email Public Information Specialist Bryan Kawasaki at bkawasaki@mojavewater.org to RSVP.
