The Mojave Water Agency and U.S. Geological Survey are working together in a comprehensive program to monitor water levels and maintain historic records throughout the Regional Basin. The graphed wells are selected based on spatial and temporal representation of the Subarea.

All wells on the Hydrograph Map are a part of the MWA Monitoring Program, and have data available to the public at either the Mojave Water Agency Website, and/or the USGS National Water Information System Water Data for the Nation Website. For more information please contact Mojave Water Agency.
