| IRWM Plan Objectives Met | | | |
| Prim. | Second. | | |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | 1. Balance average annual future water demands with available future supplies to ensure sustainability throughout the Region between now and the 2035 planning horizon and beyond. | |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | 3. Maintain stability in previously overdrafted groundwater basins and reduce overdraft in groundwater basins experiencing ongoing water table declines. | |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | 7. Provide support and assistance to Disadvantaged Communities and help facilitate projects and programs that benefit those communities. | |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | 8. Protect and restore sensitive environmental areas in coordination with land use and conservation plans to support stewardship and awareness of environmental resources. | |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | 9. Improve stormwater management throughout the Plan area. | |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | 2. Continue improving regional water use efficiency by implementing a portfolio of conservation actions that are regionally cost-effective. | |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | 10. Preserve local beneficial uses as it relates to water quality of water supplied by each source, including groundwater, stormwater, surface water, imported water, and recycled water. | |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | 11. Obtain financial assistance from outside sources to help implement this Plan across a range of project sizes during the planning horizon. | |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | 13. Identify and establish reliable funding sources to maintain, modernize and improve water infrastructure to ensure a high quality, resilient and reliable water supply. | |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | 14. Increase the use of recycled water in the Region while maintaining compliance with the Mojave Basin Area Judgment. | |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | 4. Address the State policy goal of reducing reliance on the Delta by meeting water demands with alternative sources of supply during times when State Water Project (SWP) supplies are reduced or unavailable due to droughts, outages, environmental and regulatory restrictions, or other reasons. | |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | 5. Optimize the use of the Region's water related assets to maximize available supplies to meet projected demands while mitigating against risks. Water related assets to be optimized include financial resources, groundwater storage programs, available imported water supplies, transfer and exchange opportunities, available physical infrastructure, and management policies. | |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | 12. Improve public awareness of water supply, conservation, water quality, and environmental stewardship challenges and opportunities throughout the planning horizon. | |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | 6. Prevent land subsidence throughout the Region. | |
