EQUAL EMPLOYMENT OPPORTUNITY

The Mojave Water Agency is an equal opportunity employer. We observe a no-smoking policy within Agency offices and vehicles, and also maintain a policy as a drug-free workplace. The Agency makes reasonable accommodations for the disabled. If candidates require special arrangements to participate in the interview process, they should state their needs in writing when submitting an application.

ABOUT THE AGENCY

The Mojave Water Agency (MWA), one of 29 State Water Contractors, is a governmental body with primary responsibility for the management of water resources over a 4,900 square-mile area of the Mojave Desert. It is the Agency's mission to implement future water management policies and programs that will ensure a stable, long-term supply of water for the Mojave Water Agency's service area.

MOJAVE WATER AGENCY

Manage the region's water resources for the common benefit to assure stability in the sustained use by the citizens we

Invites Your Interest for the Position of

Water Systems Operator I or II

THE POSITION

The ideal candidate inspects, operates, maintains, services and performs complex and difficult operational repairs and maintenance duties on potable and non-potable water lines for both water supply and water quality, at the Agency's facilities, pipelines, meters, pump stations, wells, and related facilities; and performs related work as assigned.

Some examples of typical job functions are:

Performs a variety of duties relating to operating and maintaining the water supply and water quality, potable and non-potable water lines, including measuring well levels, calibrating instrumentation equipment, investigating leaks, cleaning mains and flushing the water system, and conducting water quality sampling. Performs recharge pond maintenance including removing sediment, building berms, setting flow rates, calculating percolation rates, and monitoring soil conditions. Monitors and operates water systems via Supervisory Control and Data Acquisition (SCADA) systems. Reviews data and sets up telemetry equipment to operate waterlines in order to ensure an adequate and safe supply of water in the Agency's reservoirs and pipelines. Collects water quality samples and maintains compliance with the State Water Resources Control Board's (SWRCB) regulations related to potable water lines; monitors and adjusts the delivery of chemicals and materials; and performs calculations. Performs the full range of repair and maintenance work for facilities, meters, pipelines, pump stations, wells, and various equipment, including, but not limited to, pipefitting, valve repair, cement work, electrical work, carpentry, painting, and plumbing. Conducts Underground Service Alerts (USA) investigations, including traveling to specific sites, inspecting and marking areas for the pipeline ensuring contractors comply with specifications, and filing the appropriate report(s). Performs field security checks and monitor the condition of structures; takes and records meter readings.

Some examples of knowledge & abilities are:

Operations and maintenance procedures utilized for water treatment, distribution and maintenance. Principles and methods of water treatment, including basic microbiology, chemistry, and hydraulics as applied to water treatment; basic water treatment processes and the tests used to check the effectiveness of such processes; chemical and biological tests used in monitoring water treatment facility processes. Principles and practices of mechanical and electrical maintenance. Water quality monitoring and sampling techniques and methods. Applicable federal, state, and local laws, regulatory codes, ordinances, and procedures relative to the assigned area. Agency and mandated safety rules, regulations, and protocols. Inspect, operate, and maintain the water treatment and distribution facility. Perform daily operational controls and monitoring of facility processes. Perform mechanical repairs, maintenance work, and modifications to equipment used in a water treatment facility; use various mechanic's tools with skill and accuracy. Inspect facility operations and detect problems; perform technical procedures in facility operation; perform laboratory tests in facility monitoring. Calculate flow, volume, detention time, chemical dosage and pressure. Operate heavy equipment; use a variety of hand and power tools such as a signal generator, welder, and pipeline locator in the performance of daily tasks.

For the list of the typical job functions, knowledge & abilities, and licenses/certifications, please see the job description on the Agency website at: www.mojavewater.org/about-mwa/human-resources/
