Mojave Water Agency Invites Public to Join Virtual Master Plan Community Conversation

Apple Valley, CA — Mojave Water Agency is inviting residents throughout its service area to participate in a virtual community conversation on Wednesday, Sept. 2, at 5:30 p.m. as the Agency continues development of its Master Plan and looks ahead to priorities for the next five years.

The Zoom meeting will provide an opportunity for community members to learn more about the Master Plan process, hear about the Agency's role in securing and managing regional water supplies, and provide input about the water issues and priorities that matter to the communities MWA serves.

"Planning for our region's water future requires more than looking at infrastructure, water supplies, and projections. It also means listening to the people who live and work here," said MWA Director of Water Resources. "This community conversation is an opportunity for residents to learn more about the work we do, ask questions and help us better understand what is important to them as we plan for the years ahead."

The Master Plan will help guide Agency priorities, investments and activities over the next five years. Public engagement is an important part of that process, helping MWA understand community awareness, concerns, and priorities across its service area.

The Sept. 2 meeting will be held virtually via Zoom, making it accessible to residents throughout the Agency's service area.

Residents interested in participating are asked to register by completing a brief online survey at <https://www.surveymonkey.com/r/2W3ZPWR>. Those who register will receive the Zoom meeting link by email prior to the meeting.

Community members are encouraged to participate whether they are already familiar with Mojave Water Agency or simply want to learn more about how water is managed and planned for in the region.

Mojave Water Agency, which was established in 1960, plays a vital role in securing reliable water supplies for the High Desert region. As one of 29 State Water Project contractors, the Agency manages water resources across a 4,900-square-mile service area, promoting long-term sustainability and stewardship. For more information, visit the Agency's website at www.mojavewater.org or follow us on social media @mojavewater.
